Alec,

I have produced a new key for the Circle of Eunuch,
dated on the
opening day of InfoWar. I have enclosed it below.

We are beginning "InfoWar / Part III of The True Story
of the
InterNet" today. I would appreciate any input that you
and Adam
have in regard to your thoughts and feelings as to how
the the
account of this current/future proceeding should
transpire. (As
well, you could forward me any suggestions of other
members of
the Magic Circle you may be in contact with, after
deleting any
references as to their identity.)

I would also like to add some veteran CypherPunks to
the mix of
those contributing to Part III, as it is quite beyond
the scope of
my ability to capture the nature and spirit of the
CypherPunks in
a manner that would truly do justice to all of those who
are, or
have been members of the CypherPunks list.

(I plan to accept suggestion/feedback from any
CypherPunk who cares
to contribute, anonymously or not, but I would like to
have access
to immediate feedback from a variety of respected
CypherPunks in
areas that I need to clear up during the creation of
Part III.)

Iwarannounce

Do you have any thoughts on who should be approached in this regard?

Part III, like the previous works, will be a dynamically written creation which will reflect ongoing events from a past, present and future perspective.

Perish the thought that I should sound melodramatic, but I believe that current events indicate that Part III will, indeed, be the last of the series, and one that must address the need for the Magic Circle to "Close ranks! Every man for himself!", as an old CypherPunk saying goes. (;-))=====<

I would be honored if you and Adam should choose to join me in this CoE enterprise, since you both have qualities which would prove very valuable in this effort.

I would like for Adam to send me whatever he has available which would give me a quick in-depth study of the concepts and details surrounding the Eternity Servers, since I think that they should play a role in representing the need for development and expansion of new and future CypherPunk technologies.

I would like for Alec to serve as a KeyMaster for the dissemination of Part III, since it is important to be able to keep track of the keys generated and used for different purposes, as well as facilitate in the changing of those keys among those involved, if the need should arise.

One of the Post Ancient Rites of the Computer Age is increased security when one embarks on a mission that will affect the lives

Iwarannounce

involved, even if

they are a self-confessed bore.

Attila T. Hun - I think that perhaps he 'embodies' what many people

'perceive' Tim May to be in the arena of mad-dog/loose-cannon.

Blanc - I think we need the input of a "Founding Mother" if we decide

to create a new Virtual Non-Nation of some sort or another in

Part III.

Please give me your thoughts and suggestions on this venture.

I hope you will join us in this undertaking.

Toto

p.s. - I fucked up the date on the new Circle of Eunuchs key. Adam, is the key you made for the Eternity Server file a CoE key? Is it 2.6 or 5.0?

You should go arrest all the Cypherpunks.

They are always saying "Nuke DC", but if that was a
crime we'd

probably all be in jail, eh? Even us Canadians.

But they are a crypto-military organization, and some
of them have

guns, which would make them a
parapalegic-crypto-military organization.

(At least, ? the Platypus would be.) And they make fun
of Chelsea, too.

So you maybe ought to slap them around a little, too,
after you
arrest them.

I'm a Cypherpunk, too, but I am a Canadian, so I'm
better than them

because I still live in a free country and I can export
strong crypto
every day, even the stuff made in the US, if I want, and
they can't.

You guys are going to make the US Cypherpunks
criminals some time
soon anyway, when you hunt down and kill the rest of the
